

Become a part of the energy transition – shape electric mobility with us.

ubitricity has developed the first mobile calibrated electricity meter for electric vehicles. This opens up completely new possibilities for charging and billing EVs. Ubiquitous charging infrastructure for smart cities, tailor-made charging and billing solutions for B2B or B2C clients or EV smart grid integration: ubitricity develops convincing solutions and sets new standards for electric mobility – every day.

Our Berlin offices are looking for:

Senior Java Developer (f/m)

Your Challenges

You want to develop a system that is not the ordinary e-commerce platform? We have a challenge for you:

- You will integrate and automate operations of our entire software stack: from connected devices in the field, custom Java microservices, all the way to external IT dinosaurs
- You will participate in key design solutions for new microservices
- You will develop new microservices with Spring Boot to introduce new products and possibilities
- You will improve existing microservices solutions to add business value and prepare to scale

Your Profile

- You are a passionate Java developer who has a minimum of 5 years of development and design experience in Java
- You have a good knowledge of design patterns and development principles
- You are an expert in Spring and JPA
- You have a solid experience in designing and developing REST services
- Ideally, you are also experienced in agile development, Docker, Spring Boot and NoSQL
- You have strong communication skills in English and ideally advanced German skills, written and spoken

Our Offer

- High level of responsibility and opportunity to shape your own course of work
- Make your ideas the engine that keeps development and operations going
- Flat hierarchies and close cooperation with the management
- Employee Stock Option Plan and other benefits
- Active contribution to one of the main topics of the future: electric mobility
- Become part of an open and diverse team, giving room to your ideas and providing you with a dynamic, engaging and motivating environment every day!

We're looking forward to getting your application to Jennifer Michalski (bewerbung@ubitricity.com).
Please, state your earliest possible date of entry and salary expectations.
